

Dr. Tina Moen has spent the last 17 years in the healthcare information technology industry providing clinical leadership to colleagues and clients in the US and abroad. Dr. Moen serves as Senior Deputy Chief Health Officer & Chief Pharmacy Officer within IBM Watson Health. In this role, Tina works across the business providing clinical leadership and support for strategy and sales. Additionally, she leads efforts to educate the business on the published evidence that supports Watson Health solutions, as well as broader IBM technology. Prior to IBM, she was VP of Client Strategy for Health Language, part of Wolters Kluwer Health. In this role, she collaborated with clients to identify their terminology needs and worked to deliver a solution to "unlock" data and drive semantic interoperability across the enterprise. Previously, Tina worked at Truven Health Analytics in a variety of roles. She served as the VP of Provider Analytics, leading a team of data scientists and researchers responsible for creating/maintaining data and methodologies. As Chief

Clinical Officer for the Truven Provider business, Tina was responsible for clinical leadership for the clinical evidence and intelligent evidence product lines. Tina led and contributed to a team of clinicians responsible for communicating the value proposition of Micromedex Solutions in domestic and international markets. In addition, she led the Truven editorial staff, who are responsible for creating/maintaining content for evidence-based medicine solutions, including drug, disease, toxicology, patient education and surveillance solutions.

Dr. Moen received her Doctor of Pharmacy degree from Creighton University. Prior to moving into the healthcare information technology industry, she worked as a clinical pharmacist in the specialty areas of pediatrics, home healthcare, HIV, and organ transplantation.
