## A Program to Facilitate Informed Formulary and Benefit Decision-Making

Preapproval Information Exchange (PIE) allows manufacturers to proactively share information with approved health care decision makers in advance of products coming to market or for new indications being considered by the Food and Drug Administration. AMCP PIE programs create an opportunity to share that information.

AMCP has many ways to help stakeholders utilize PIE. In addition to in-person Science & Innovation Theaters on PIE at Nexus and the Annual Meeting, AMCP offers **PIE webinars**. Benefits of the webinar include:

- Flexible scheduling throughout the year
- A proven system to certify participants as health care decision makers \*
- A secure, state-of-the-art webinar system

***For more information, please email [corpopportunities@amcp.org](mailto:corpopportunities@amcp.org)***

Subject to federal laws and regulations, participation in PIE programs is restricted to payors, formulary committee, or other similar entity representatives with knowledge and expertise in the area of health care economic analysis, carrying out responsibilities for the selection of drugs for coverage or reimbursement.

\* PIE webinars use the AMCP eDossier system to register and certify participants.
